Experiment – 14

Virtual Hard Disk

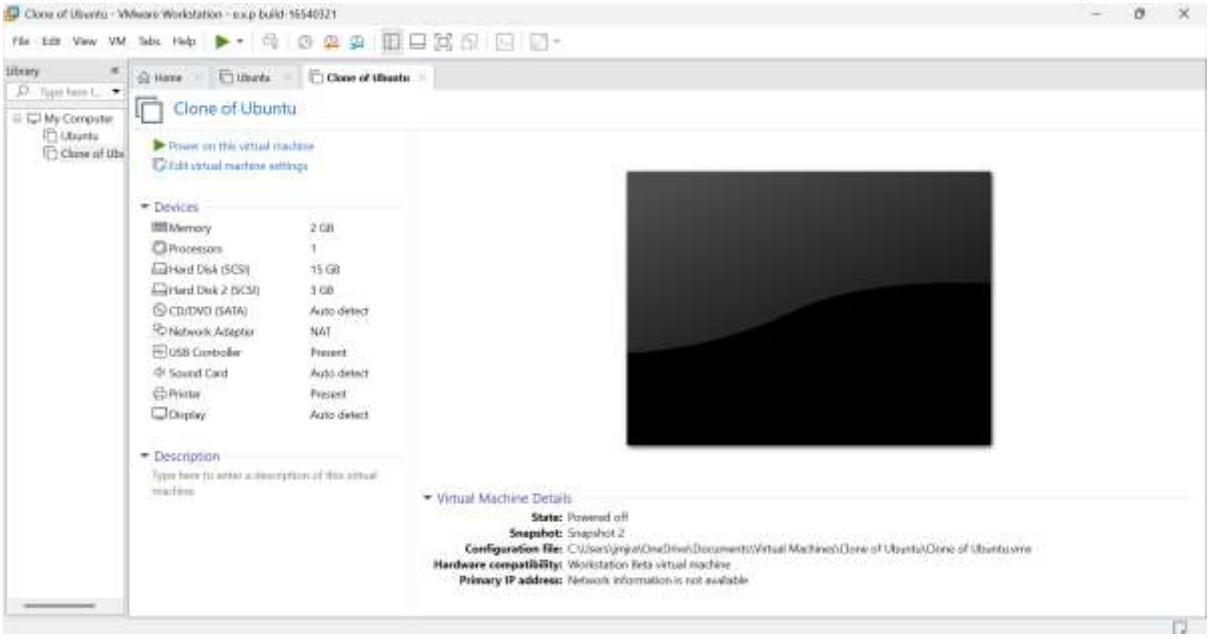

Aim

To create a Virtual Hard Disk and allocate storage using VMware Workstation.

Procedure

1. Open VMware Workstation on the host computer.
2. Select the virtual machine or create a new one.
3. Open the VM Settings option.
4. Click Add and select Hard Disk.
5. Choose the virtual disk type and click Next.
6. Select the required disk interface.
7. Choose Create a new virtual disk.
8. Allocate the required disk storage capacity.
9. Select the disk file storage option and specify its location.
10. Click Finish and verify that the virtual hard disk is created successfully.

Output

Result

Thus, a Virtual Hard Disk was successfully created, and the required storage capacity was allocated using VMware Workstation.
