Experiment – 13

Virtual Machine Creation

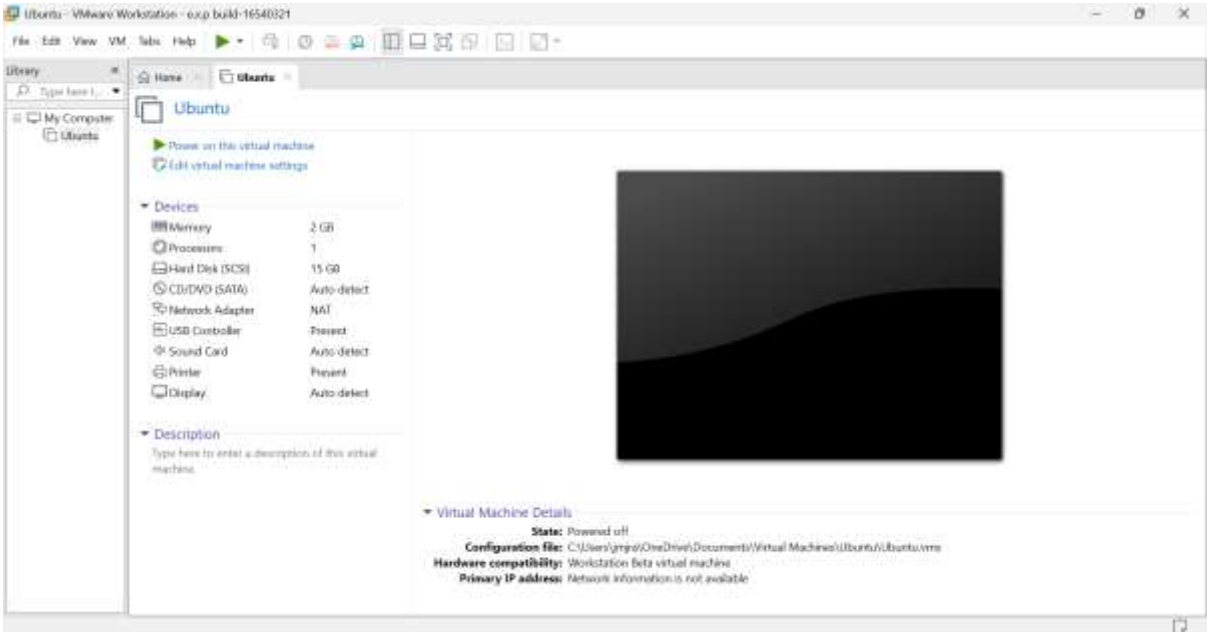

Aim

To create a Virtual Machine using VMware Workstation, a Type 2 virtualization software, with 1 CPU, 2 GB RAM, and 15 GB storage disk.

Procedure

1. Open VMware Workstation on the host computer.
2. Click Create a New Virtual Machine.
3. Select Typical Configuration and click Next.
4. Choose the operating system installation method.
5. Enter the virtual machine name and storage location.
6. Select the guest operating system and its version.
7. Allocate 1 CPU core to the virtual machine.
8. Set the RAM to 2 GB (2048 MB).
9. Create a virtual hard disk with 15 GB storage.
10. Review the settings, click Finish, and start the virtual machine.

Output

Result

Thus, a Virtual Machine was successfully created using VMware Workstation with 1 CPU core, 2 GB RAM, and 15 GB storage.
